EDUCATION

Prime University

B.Sc. in CSE — GPA: **3.72** / 4.00 (up to 7th Semester)

Dhaka, Bangladesh

Jan 2023 – Jan 2027 (Expected)

Ideal College, Dhanmondi

Higher Secondary Certificate (HSC) — GPA: **5.00** / 5.00

Dhaka, Bangladesh

2021

EXPERIENCE

iHateResume

Remote

Platform Engineer Intern

Jun 2026 – Present

- Built **Kuiper**, a distributed job crawler that scrapes heterogeneous sources (**BDJobs**, career pages), **normalizes** them into a unified **PostgreSQL** schema, and fans results to subscribers via **RabbitMQ** and a **REST API**.
- Built **distributed tracing** from zero with **OpenTelemetry** — auto-instrumenting FastAPI, async Postgres, and HTTP clients into a self-hosted **OTEL Collector** and **Jaeger**, plus trace-correlated JSON logging that links logs and traces by trace ID.
- Hardened production security across **Docker** and the API: **non-root** containers with digest-pinned images, DB credentials removed from committed Compose files, **CORS** scoped to production origins, server-side AI-key validation, and root-caused a FastAPI × OpenTelemetry bug that 500'd every CORS preflight.
- Cut paid AI spend with a content-hash **caching** layer that skips redundant provider calls, plus job-description normalization that trims prompt size and per-token cost.
- Strengthened **CI/CD** (GitHub Actions) — explicit test-coverage gate, **mypy** static typing, and a Node/Python base-image migration, all shipped via a branch/PR/code-review workflow.

TECHNICAL SKILLS

Languages: C++, Python, TypeScript, JavaScript, Bash/Linux

Platform & DevOps: Docker, Docker Compose, GitHub Actions (CI/CD), PostgreSQL, RabbitMQ, OpenTelemetry, Jaeger, Git

Frameworks & Tools: FastAPI, SQLAlchemy, pytest, Node.js, Express.js, Socket.IO, React

Concepts: Observability (Tracing/Logging), CI/CD Pipelines, Containerization, REST APIs, Message Queues, JWT/OAuth Auth, WebSockets, DSA

PROJECTS

DriveStack | TypeScript, Node.js, React, Google Drive API |  Live

2026 – Present

- Full-stack web app that connects multiple Google accounts and unifies their Drive storage into a single file system with OAuth 2.0 multi-account authentication.

LocalShare | TypeScript, Node.js, Socket.IO, WebRTC |  GitHub

2026 – Present

- Open-source** AirDrop-style local WiFi file sharing app with WebRTC P2P transfers, server relay fallback, and event-driven backpressure; supports multi-file selection and real-time progress via Socket.IO.

COMPETITIVE PROGRAMMING

Codeforces

Online

Expert | Max Rating: **1612** | Handle: StuckOnNewbie

2022 – Present

- Solved **1500+** problems across Codeforces, CodeChef, CSES, LightOJ, SPOJ, and UVa.

ICPC Asia Dhaka Regional Contest

2023, 2024, 2025

Bangladesh

- Qualified and competed onsite three consecutive years.

Inter-University Programming Contests

2024 – 2026

Bangladesh

- Competed in **20+** national programming contests (CUET, IUT, KUET, SUST, UIU, AUST, DUET, BUBT, BUET).

CSE Fest Intra-University Programming Contest

Prime University

Champion

2024, 2025

- Won the department-level programming contest two consecutive years among 25+ competing teams.

LEADERSHIP & COMMUNITY

President

Prime University, Dhaka

Computer Programming Club, Dept. of CSE

2026 – Present

- Leading club activities including contests, workshops, and training camps. Taught and mentored **300+** students in competitive programming over 3 years (2023–2025).
